

## CAPABILITIES STATEMENT

Always in Stock.

### Who we are

**Würth Additive Group, a proud member of The Würth Group, is a global leader in physical and digital inventory solutions.**

### The Würth Group

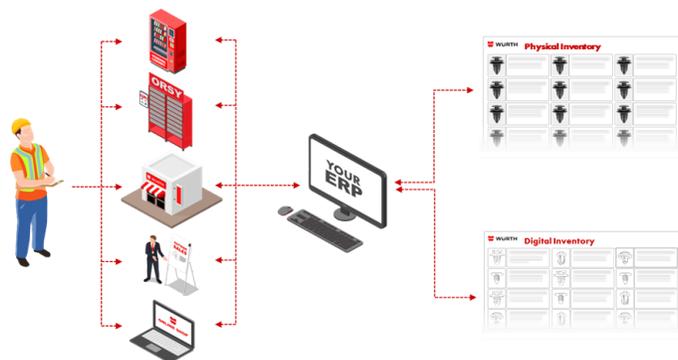

The Würth Group is a global market leader in the development, production, and distribution of industrial materials. More than 400 companies operating over 2,500 branch offices and shops in 80 countries form this \$20B+ global family business, which hails from the German town of Künzelsau. The Würth Group is built on intelligent inventory and supply chain management to deliver value-added services.

### Our vision

Making the world a simpler place to manage with digital & physical inventory programs.

### Bringing Digital Inventory to Life

Würth's Digital Inventory Services (DIS) offers a secure, scalable way to deploy a digital supply chain program. The digital platform stores and transmits validated part data, while our physical platforms enable the distribution of materials, machines, or finished parts. In 2025, the platform became fully operational, allowing OEMs, suppliers, and service providers to manage digital files, oversee distributed production workflows, and ensure part availability through intelligent inventory programs at the point of use—helping organizations navigate supply chain complexity and production restrictions with confidence.

Digital Inventory Services (DIS) helps customers implement a total supply chain solution that improves part availability, reduces downtime, and scales on-demand production. With a strong emphasis on traceability, quality, and risk reduction, Würth Additive Group combines secure digital asset management with a comprehensive physical fulfillment model to deliver a complete solution. Through a trusted partner network of qualified service providers and technology partners, DIS empowers organizations to confidently expand their additive manufacturing capabilities with a customer-first approach.

## Digital Inventory How it Works

1

### YOU NEED A PART.

Plain and simple. The demand to get the job done right and on time means you need parts or tools.

2

### You Place an Order with Würth.

We don't want much to change. Whether you have a fully integrated system like Orsy and CPS or just order online, it's all the same.

3

### Do I buy a file or a part?

Either. If you don't have any 3D printers, do not worry. Just use "DIS Deliver" and we'll ship the final part or tool.

4

### We deliver a certified recipe.

We work with world class part providers to deliver a new method. Vetted partners have developed products that give consistent performance and results if you follow the recipe.

5

### Now that's Always in Stock.

When a successful print or delivery is completed we close the order as always. Same billing, same local partners, just new benefits with partnering with Würth.

## Core competencies

- Physical and Digital Inventory Management
- Distribution and Logistics
- Additive Manufacturing: Design, Safety, Operations
- Industrial Internet of Things
- Cyber-Security

## Key customers

- Multi-national Alternative Energy Corporation
- Product company in the Automotive Aftermarket Business
- "Magnificent 7" Consumer Electronics Company
- One of the Top American Automakers
- One of the Largest American Food Companies

## Total Solutions Provider

**Digital Inventory Services as a Stack**

## Past performance:

- Founded in 2021 as a 3D printing hardware distributor in the USA
- Expanded global presence across Mexico, Canada, Europe, and Asia Pacific
- Launched Digital Inventory Services (DIS) platform in 2025
- Established as a leader in digital supply chain distribution
- Supports hundreds of global customers
- Delivers solutions in:
  - Physical & digital inventory management
  - Additive manufacturing hardware & materials distribution
  - Additive manufacturing safety consulting

## Headquarters:

897 Airport Pkwy, Greenwood, IN 46143

- CAGE Code: 423440
- ISO 9001 & 27001 in progress for 2026 audit
- Distribution and fulfillment through Würth's global supply chain

## DIFFERENTIATORS

- Deep knowledge of Supply Chain and Additive Manufacturing
- NFPA 660 - Metal & Polymer Powder Safety Trainings
- Due to the flexibility of our programs, we are adaptable to customer needs
- Internal A2LA Accredited Labs
- Experienced Engineers and AM thought leaders
- Disruptive Digital Inventory Services software product, enjoying explosive and viral growth
- Access to million of Würth Group customers and suppliers
